

Draft EV Policy 2.0 Proposes transitioning public transport buses operated by DTC and DIMTS to electric buses.

The draft of electric vehicle policy 2.0 is likely to be announced soon by the Delhi government.

According to the proposed policy, the government recommends transitioning public transport buses operated by DTC and DIMTS to electric buses.

It is also suggested that registration of CNG autorickshaws be halted from August 15, 2025, and all such permits will be substituted or re-issued exclusively as e-auto permits.
